

# Eduroam Instructions using iOS:

These instructions describe how to set up a University of Kassel Wi-Fi using iOS, the operating system of iPhone/iPad/iPod touch.

## Requirements

- You need an activated UniAccount, which functions as the central access to the data processing services of the University of Kassel.
- The latest version of iOS should be installed on your iPhone/iPad/iPod touch. The minimum requirement is iOS 2.0.

## Registration on Wi-Fi "eduroam"

Go to *Einstellungen/Settings*, *Wi-Fi* and connect with Wi-Fi "eduroam".

Authenticate yourself using your UniAccount and click on *Verbinden/Connect*.

Install the certificate by clicking on *Annehmen/Accept*.

You are now permanently registered for the Wi-Fi of the University of Kassel. But remember that you have to change the password of the UniAccount every 180 days. This also includes the registration on Wi-Fi. In the case of a password change you are automatically asked once, when connecting with "eduroam" , for the new password.
